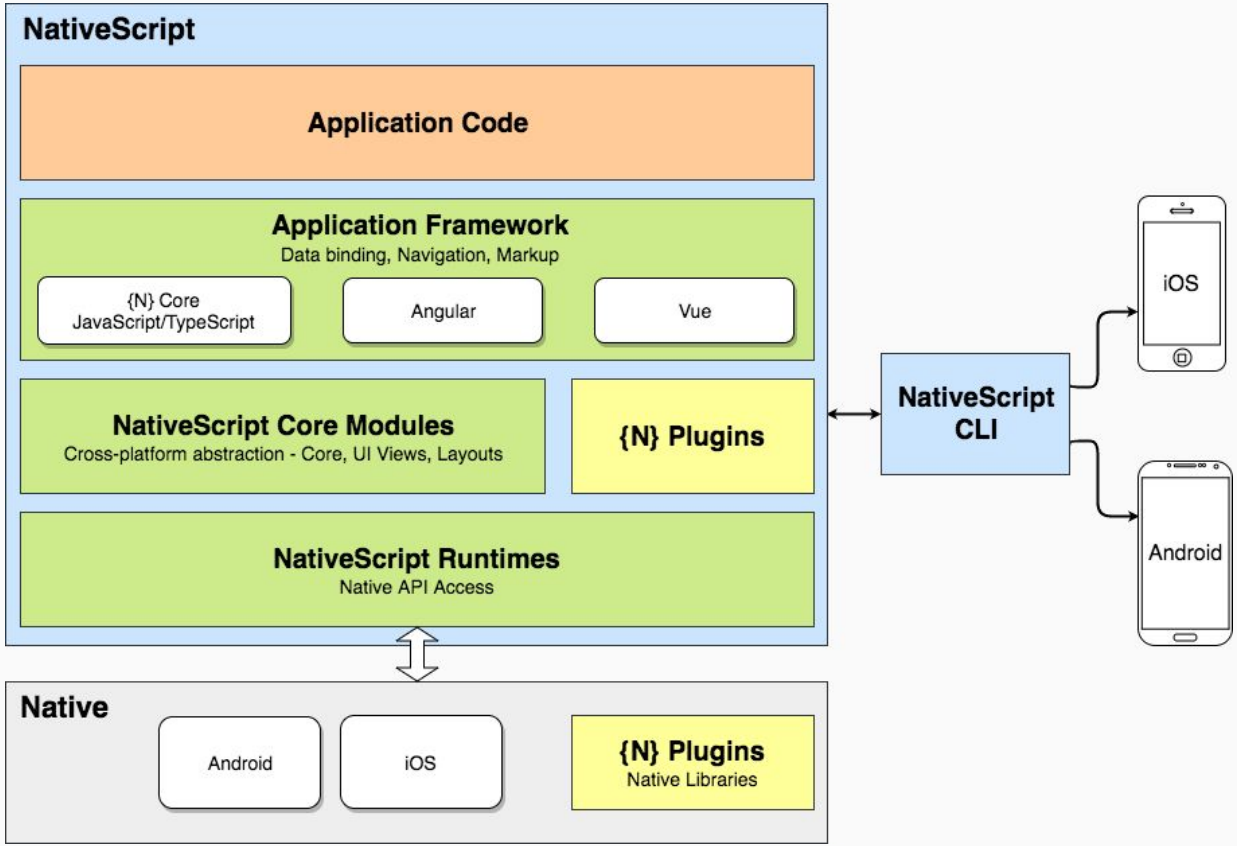
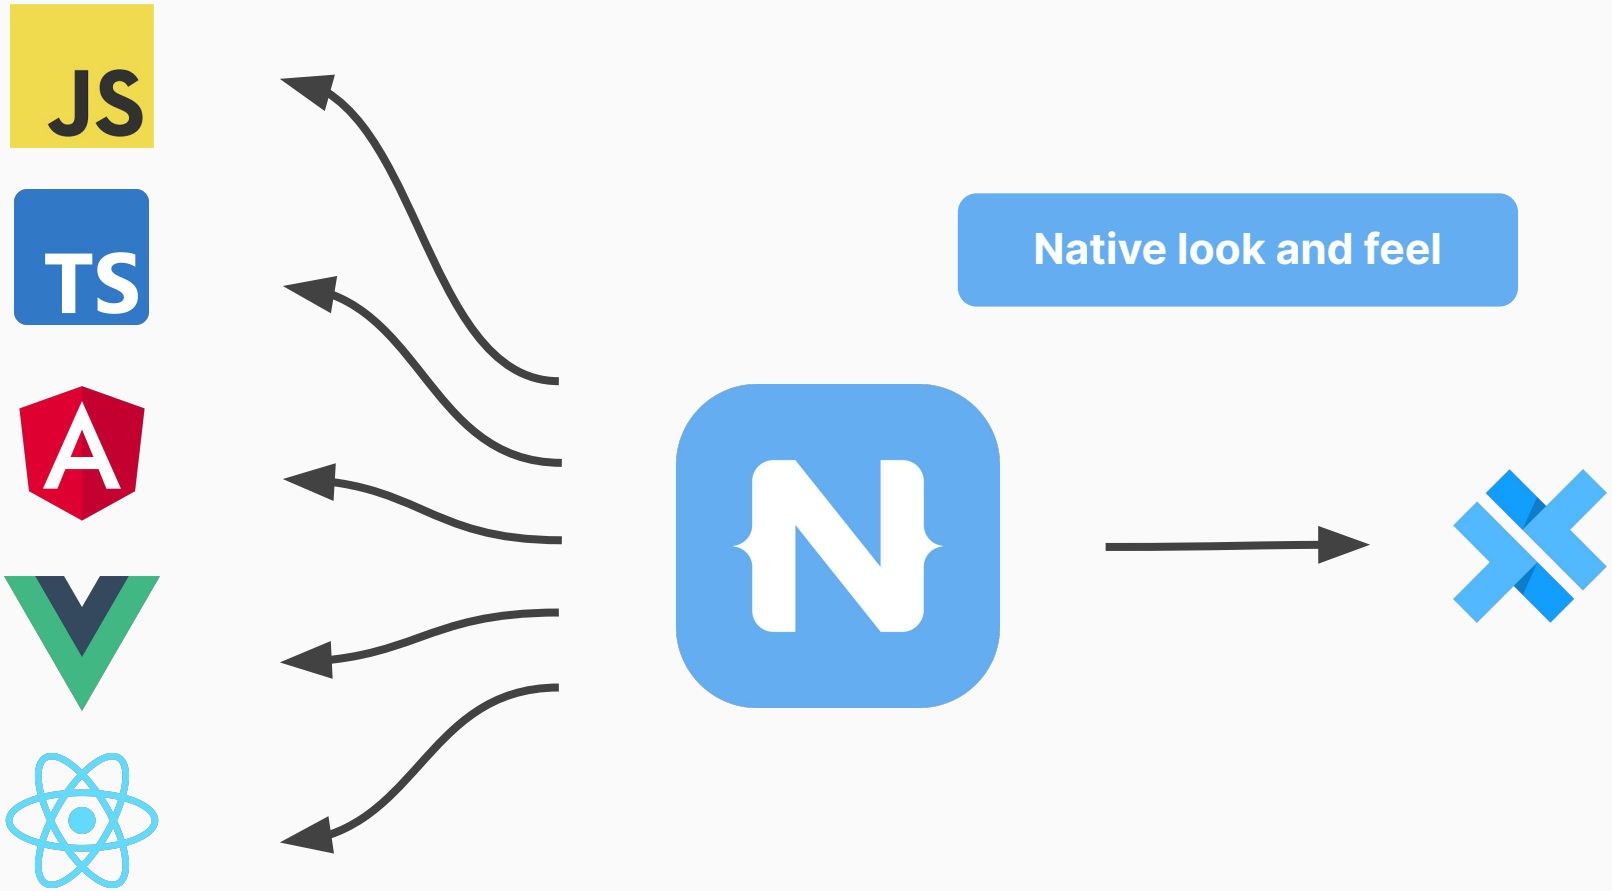
# NativeScript

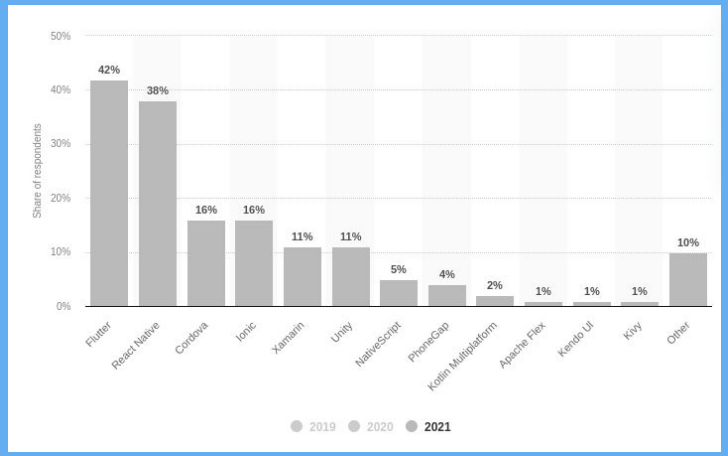
# An Interpreted approach

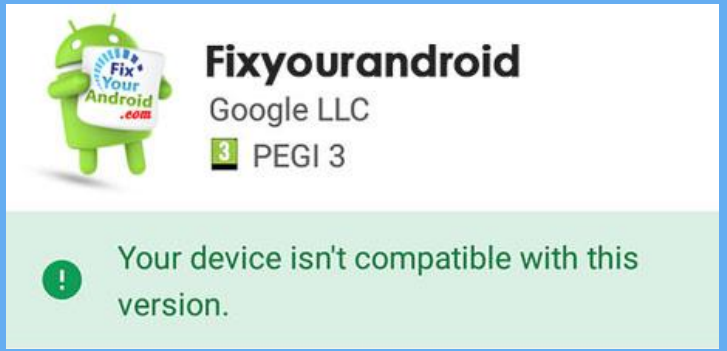


# Why NativeScript?



# Disadvantages of NativeScript





# Code example

src/app.ts

```
import { Application } from '@nativescript/core'

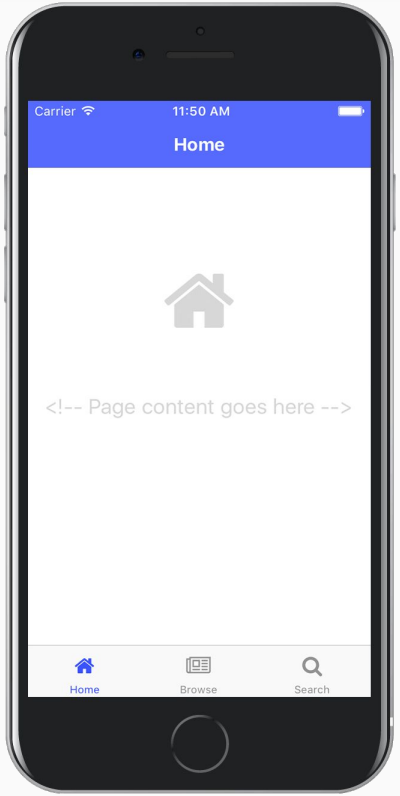
Application.run({  moduleName: 'app-root' })
```

src/app-root.xml

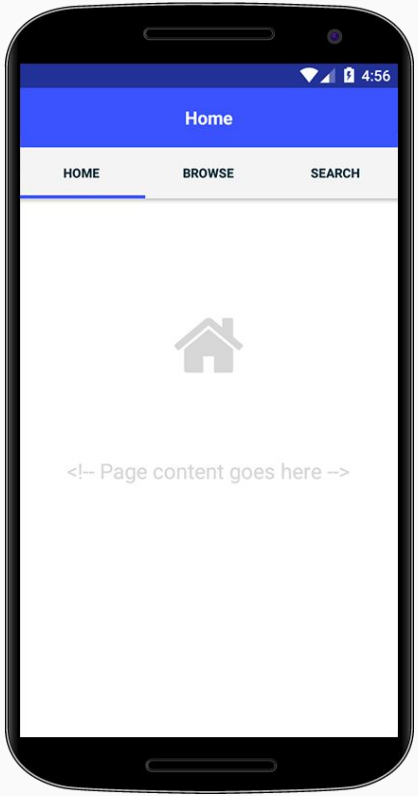
```
<TabView androidTabsPosition="bottom">
    <TabViewItem title="Home" >
        <Frame defaultPage="home/home-items-page"
/>  </TabViewItem>

    <TabViewItem title="Browse" >
        <Frame defaultPage="browse/browse-page" />
    </TabViewItem>

    <TabViewItem title="Search" >
        <Frame defaultPage="search/search-page" />
    </TabViewItem>
</TabView>
```



iOS



Android
